C. Research Support

Active/Completed:

1 R21 CA100589-01A1 Hawley (PI)

12/01/2003-11/30/2004

NCI/AHRQ

Colorectal Cancer Screening Preferences in Primary Care

The major goal of this project is to assess preferences for colorectal cancer screening options among racial/ethnically diverse primary care patients using conjoint analysis.

Role: PI

5K02 HS00007 Hawley (PI)

09/01/2000-06/30/2004

AHRQ

A Two-stage model for colorectal cancer screening

The major goal of this project was to coordinate a career development and research plan project relating that would lead to establishment of Dr. Hawley as an independent investigator in health services research and cancer prevention and control.

Role: PI

R01 HS10612-01A2 Volk (PI)

06/01/2001-12/31/2004

AHRQ

Shared decision making for prostate cancer screening for couples

The major goal of this project is to develop a computerized decision support system to foster shared decision-making among white, African American and Hispanic men, their spouses, and their physicians regarding the early detection of prostate cancer

Role: Co-investigator

1 R21 CA90463-01A2 Jibaja-Weiss (PI)

08/01/2002-07/31/2004

NCI

Microworlds for Breast Cancer Risk Reduction

The major goal of this project is to foster enhanced risk communication and informed decision-making among low literacy women at high risk for breast cancer and considering risk reduction.

Role: Co-Investigator

1 R01 CA97263 Vernon (PI)

07/1/2002-6/30/2007

NCI

A Tailored Interactive Intervention to Increase Colorectal Screening

The major goal of this project is to improve primary care patients' stage of readiness to undergo colorectal cancer screening through a tailored intervention.

Role: Co-investigator
